Re: Natures Wonder Testimonial

Kevin,

I just wanted to let you and your staff at JSH International know about a recent experience we at Josephs landscaping had with Apex 10, Natures Wonder. As you well know the month of June here in the Philadelphia region was one of the hottest and driest months on recent record. Our Landscape crews were working on a large Clubhouse project in South Jersey for a very well known Builder. We had a deadline of July 4th for their Grand opening to the residents of this pool and recreation area in a 55+ community. One of the Key elements of this project was to provide some shade trees and sitting areas for the residents in the recreation area, so we purchased 6- 15 foot plus Crepe Myrtle Trees from a local supplier who had just brought them in from South Carolina during the heat and when they arrived on the job site you could easily see they were under tremendous stress showing signs of wilt and leaf loss.

We all know that this was probably the worst time of year to be planting a tree that was in full leaf and in full bloom. We immediately got the 6 trees in the ground and saturated their root balls with Natures Wonder. For the next two weeks with daily watering these trees miraculously turned around and showed no signs of stress after two weeks, when everyone thought they wouldn't survive. Today, 5 weeks later the trees look as if they had been planted for years, and are even blooming a second time this season.

I have to say that the addition of the Natures Wonder product made a huge difference in these expensive plants survival and saved Josephs from the additional costs of having to replace them.

Best of luck to you and your staff, you have a great product that you produce and sell, and we at Josephs will be putting Natures Wonder on every plant we plant. Feel Free to contact me with any questions you may have.

Sincerely,

Pete Haran; Director of Operations
